Auto Air Conditioning

R-134a Retrofit Low Side Service Port Adapter, Cap & Label

This package contains an Adapter to changeover an R-12 to R-134a Service Port. The AC System will then be capable of receiving only a R-134a charge. This Adapter also contains a locking adhesive which prevents its removal after application. This device is required to prevent cross contamination after retrofit.

This Kit also contains:

1. Retrofit Decal which must be completed by the installer and affixed to the retrofitted air conditioning system .
2. Protective Cap for the new R-134a Port Adapter.

7/16" dimention is thread size
